IDEA-0731

Copy 5 of 5

11 APR 1962

MEMORANDUM FOR : Chief, Special Projects Branch, DPD

SUBJECT : Proposed Program for Crew Control Procedures (Attached)

Colonel Beerli has received the attached draft and has interjected his comments in the text. Three main points stand out:

1. Concerning weight control, should the pilot ^{NOT} meet the prescribed weight rather than ground him as the draft proposes, Colonel Beerli would prefer to restrict him from performing Headquarters-directed missions.

2. Annual physicals will be arranged by Headquarters. The unit Flight Surgeon should not have contact with the Clinic, but we should continue with our presently employed procedure whereby Headquarters contracts with the Lovelace Clinic and establishes appointment dates.

3. After these corrections have been introduced to the draft, Colonel Beerli requests that the draft be personally delivered to the Detachment Commander and his Flight Surgeon in draft, and their comments solicited. When this has been accomplished, Colonel Beerli will then render final approval.
